

Workshop Computambor

LIVE DRUMS + ELECTRONICS

FUN LEARNING

RELAXED ENVIRONMENT

ELECTRONIC LIVE WORLD MUSIC

BRAZILIAN RHYTHMS

PANDEIRO

DRUMKIT

From the Samba rhythms to bossa-nova to the recent wave of Brazilian electronic music, Computambor Workshops are focused on the live playing aspect of drums, pandeiro and they integrate with laptops and video projections.

The workshops are about musical, technical and above all, creative aspects of live performances.

How could you make use of Brazilian rhythms to enhance your creativity? What do techno, drum and bass and Samba have in common? How to integrate all this in Ableton Live and laptops?

The combined knowledge and experience of percussion genius Marcos Suzano and Drummer/Producer Marcelo Vig can bring new inspiration and new ideas to anyone involved in performing live or creating music. They have a fresh, relaxed and friendly approach to teach rather complex questions in a simple and easy way to understand.
